

Day 3: String & Number Operations

1. Create a directory named 'Day_3'. Inside this directory, create separate Python files for each exercise.
2. Exercise 1 (exo_1.py): Write a program that takes two numbers as input and prints their multiplication.
3. Exercise 2 (exo_2.py): Create a program that asks for a number and prints its square.
4. Exercise 3 (exo_3.py): Write a program that asks for a string and prints its length.
5. Exercise 4 (exo_4.py): Ask for a sentence and print it in uppercase.
6. Exercise 5 (exo_5.py): Write a program that takes a number and prints 'Positive', 'Negative', or 'Zero'.
